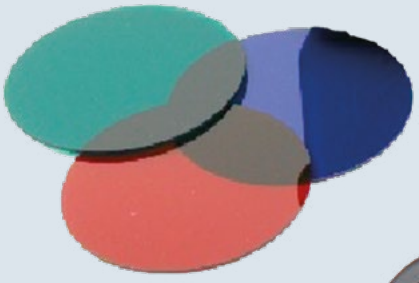
Signalling with every comfort!

Now also with LED!

Safety first

Safe signalling: This is what our **HML-ISO day signalling searchlight** stands for, which is now also available with a up to date LED module.The ergonomic housing of our HML-ISO enables simple operation and convenient handling. **Operation is possible with 12 V or 24 V DC operating voltage**, which the searchlight recognises electronically on its own. **Certified and approved by DNV** in accordance with SOLAS and MED, the day signalling searchlight also impresses in terms of safety!



Colour filters are mounted from the outside without opening the device.

Practical front rocker switch with integrated micro-switch makes signalling very comfortable.

Integrated SOS function and battery-LED status display at the rear of the device.

Our VentGLAND®, the breathing cable gland, protects the device from condensation water. Its anti-kink spiral protects the cable against line breaks.

Adjustable hand straps for both, left-handed and right-handed persons.
